Transforming Higher Education Institutions (HEIs) into Multidisciplinary HEIs

Approaches towards Setting Up of Multidisciplinary HEIs

1. HEI Clusters
   Academic collaboration between institutions, through HEI clusters, leading to multidisciplinary education and research in different modes.
   - Institutional collaboration leading to the award of dual-major degrees
   - Collaboration between two institutions for the award of dual degree:
     - first degree at the host institution
     - second degree at the partnering institution
   - Forming Cluster of Colleges

2. Merger
   Merger of single-stream institutions with other multidisciplinary institutions.
   - Institutions run by same managements
   - Institutions under different managements

3. Adding Departments
   Strengthening of institutions by adding departments in various subjects.
   HEIs will need to open departments for multidisciplinary subjects such as Departments in Languages, Literature, Music, Philosophy, Indology, Art, Dance, Theatre, Education, Mathematics, Statistics, Pure and Applied Sciences, Sociology, Economics, Sports, Translation and Interpretation, etc.
